Project Delivery Instructions

A.Y. 2022-2023

Giacomo Cappon

General info

- This file will instruct you on how to deliver your project. In a nutshell, you must prepare and submit a **.pdf file** containing
 - the number of your group and the name of each group participant
 - the link to a public GitHub repository containing a "valid" version of the code
- Since the project must be delivered through GitHub, code delivered via mail will be ignored
- "Valid" code must be in the **master** (or **main**) **branch** and must have been committed no later than the **30th of June**

Example scenario

- "I belong to Group 50 composed by me, Martina Vettoretti, and Luca Cossu"
- "My code is located in my public repository named bwthw"

Step 1: Fill the group info

- Create a .docx file
- Fill the group info at the very top of the file, e.g.:

Group 50

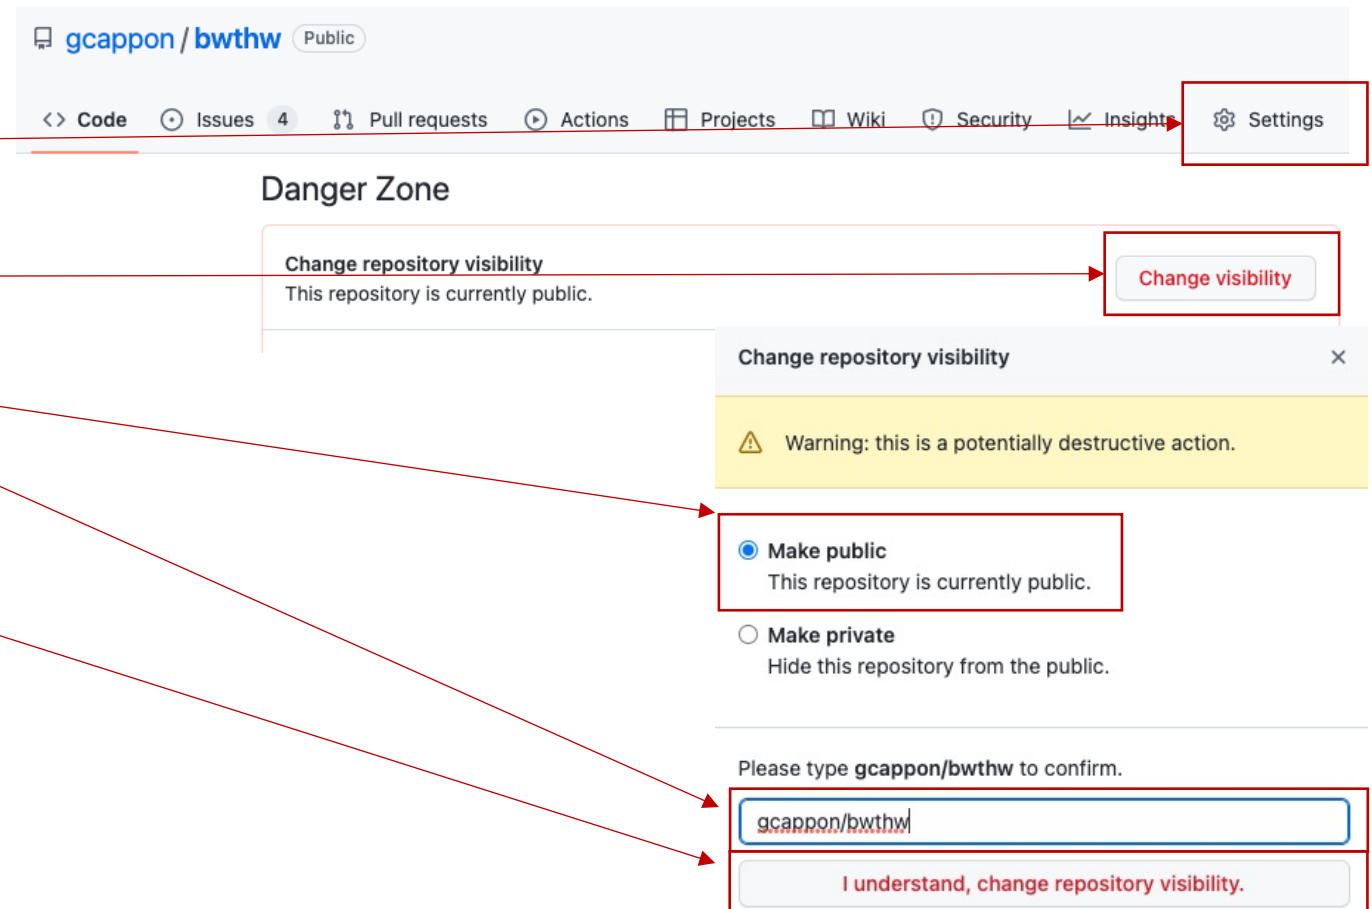

Group members:

ID	Name	Mail
1234567	Giacomo Cappon	giacomo.cappon@unipd.it
1234568	Martina Vettoretti	martina.vettoretti@unipd.it
1234569	Luca Cossu	luca.cossu@phd.unipd.it

Step 2: Make your repository public

- First, make sure your repository is public. This is true if, in GitHub, a “public” label is present near your repo name: 
- If, instead, the label says “private”, follow these steps to make it public:

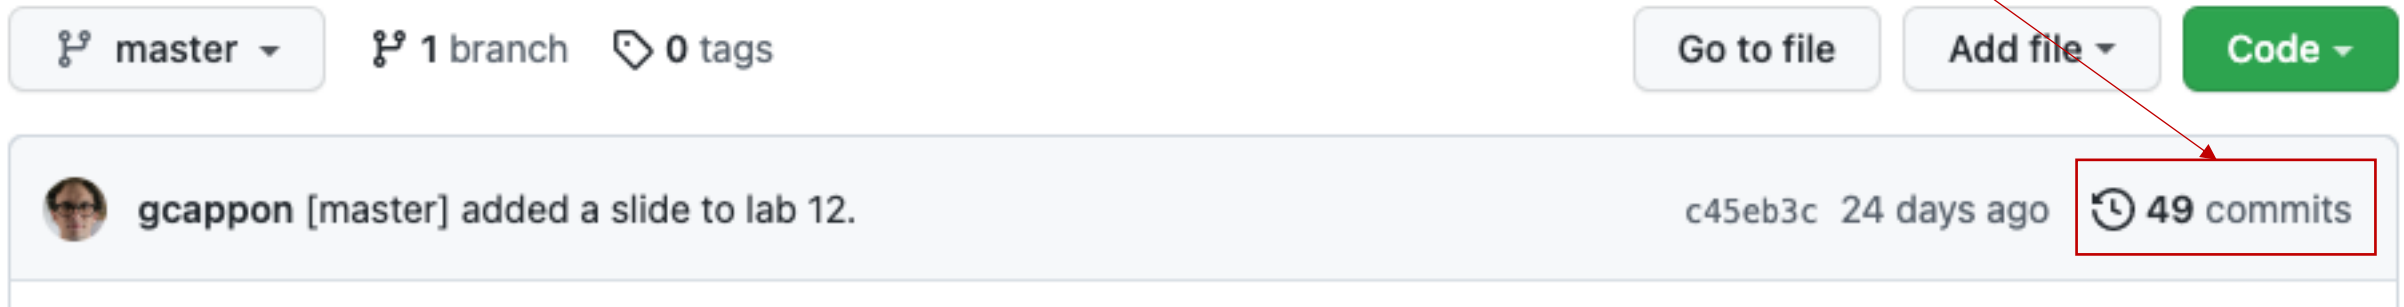

- Go to “Settings”
- Scroll down till the “Danger Zone”
- Click on “Change visibility”
- Select “Make public”
- Type the name of the repo to confirm
- Click on the button

The screenshot shows the GitHub repository settings page for 'gcappon / bwthw'. The repository is currently public. The 'Danger Zone' section contains a 'Change repository visibility' button. A modal dialog titled 'Change repository visibility' is open, showing a warning: 'Warning: this is a potentially destructive action.' Below the warning, there are two radio button options: 'Make public' (selected) and 'Make private'. The 'Make public' option has a subtext: 'This repository is currently public.' Below the options, there is a confirmation prompt: 'Please type gcappon/bwthw to confirm.' A text input field contains 'gcappon/bwthw'. At the bottom of the dialog is a button that says 'I understand, change repository visibility.'

Step 3: Locate the link to a valid code version

- From the home page of your GitHub repo, click on the “history” link

- Click on the link of the version of the code that you want to submit

- Note: be sure that your are in the master (or main) branch!

Step 4: Put the link in the .docx file

- Copy and paste the link in the url bar of your browser in the .docx file below the group info, e.g.:

← → ↻ 🏠 github.com/gcappon/bwthw/commit/c45eb3c20d26fe17af9c05c4fb94e883d0404929

Group 50

Group members:

ID	Name	Mail
1234567	Giacomo Cappon	giacomo.cappon@unipd.it
1234568	Martina Vettoretti	martina.vettoretti@unipd.it
1234569	Luca Cossu	luca.cossu@phd.unipd.it

Link to the GitHub repository:

<https://github.com/gcappon/bwthw/commit/c45eb3c20d26fe17af9c05c4fb94e883d0404929>

Step 5: Submit the .pdf to moodle

- Export your .docx file to .pdf
- Then, go to moodle. In the “Project discussion – Project delivery” section locate “Project delivery”:
- Click on the delivery button:
- Upload the .pdf file
- Save and that's it!
